# the Bounces

## Market Alerts

EGGPLANT AND PEPPERS Eggplant pricing is up this week, primarily due to short supplies out of California and Mexico. Bell Peppers are also higher due to the same growing conditions. Quality is good to fair, with Choice-Grade Green Bells the best cost and quality option.

**POTATOES** As the storage crop winds down, **Idaho 80 CT potatoes** and smaller are the best buys, and will continue to be throughout the summer. Avoid **70 CT or larger** where possible. Quality is good across all sizes.

**AVOCADOS** The supply of product out of Mexico continues to be severely restricted, due to a combination of growing condition and import issues. Product from other sources, including California, is not plentiful enough to offset the Mexican shortage, and pricing continues to be much higher than normal.

APPLES Apples are also a storage crop, and some varieties are running low on small fruit. Granny Smith and Golden Delicious are currently the most impacted, with 88 CT and larger being more available than 100 CT and smaller. Consider using Fujis or Galas as an alternative where smaller sizes are needed.

#### A Peek at Peak Seasons

Locally Grown Products: The local growing season is starting up. Michigan Blueberries, Virginia Corn, New Jersey Peppers, Long Island Lettuces and other products are now available. Ask your distributor for this week's local farms list!

**Stone Fruit:** Domestic harvests of peaches and nectarines have begun. Ask your distributor for availability.

Blackberries & Raspberries: California and Mexico are peaking, with great quality and pricing reported.

**Asparagus:** Locally grown asparagus is being harvested in many parts of the Pacific Northwest, Midwest and Northeast U.S. Ask your distributor for what's available!

**Grapes:** California Red and Green Grapes are in great supply, with excellent quality and pricing reported. Late spring/early summer is the best time of year to feature grapes on your menus.

## Weather Update

**California:** Much hotter, drier conditions are expected throughout the week in the inland growing regions. Temperatures could hit 100 in some areas.

**Mexico:** Tropical Storm Calvin's dissipation is bringing showers and "monsoonal moisture" to most of Central Mexico.

**Florida:** Rainy conditions, some thunderstorms and seasonal temperatures are expected throughout the week.
